

# Check Point Firewall

# About Course

The Check Point firewall will control IP forwarding by enabling it after its services are started. The firewall also loads a default filter during the boot process, which essentially denies all inbound traffic but allows outbound traffic.

# **CHECK POINT FIREWALL**

---

## **CURRICULUM**

---

1

### **Initial Installation And Configuration**

**Security Manager Overview and Installation**

**Security Manager Initial Configuration**

**Default User Accounts**

**Gateway Installation**

**Gateway Initial Configuration**

**Introduction to SmartConsole**

**Adding a Gateway to the Security Management Server**

**Backward Compatibility**

**Resetting SIC**

**Static and Default Routes**

**Snapshots**

**SmartUpdate and Licensing**

2

### **Security Policies**

**Intro and Lab**

**Adding a Second Gateway Demo**

**Zone-Based Policies Lab**

**Time-Based Policies Lab**

**Section Titles and Inline Layers**

Section Titles and Inline Layers Demo  
Multiple SmartConsole Admins Demo  
Installing Policies on Multiple Gateways Lab  
Policy Packages Overview  
Configure Multiple Policy Packages Lab  
Troubleshooting Security Policies Lab  
Implied Security Rules Lab

### 3 Network Address Translation

Network Address Translation (NAT) Overview  
Source NAT Lab  
Destination Static NAT Lab  
Auto-NAT Priority Order  
Auto-NAT Priority Lab  
Manual NAT Rules Overview  
Manual NAT Lab

### 4 Advanced Firewall Features

Gateway High Availability  
Check Point Features  
URL Filtering  
Application Control  
HTTPS Inspection Overview  
Configure HTTPS Inspection  
Filtering Site Categories Demo

**Identity Awareness Overview**  
**Identity Awareness Lab**  
**Threat Prevention Policy Overview**  
**Threat Prevention Policy Example**  
**Anti-Spoofing**

## **5** **VPNs**

**Site-to-Site VPN Overview**  
**IPsec Overview**  
**IPsec Site-to-Site VPN Demo**  
**VPN Tunnel Utility**  
**SmartView Monitor Overview Lab**  
**Suspicious Activity Monitoring Lab**  
**SmartEvent Overview Lab**

## **4** **Command Line Interface**

**Interface Config using CLI Lab**  
**Locks in Gaia Lab**  
**Removing a Policy at the CLI**  
**CPView**  
**CLISH and Expert Mode**  
**Processes and Daemons Overview**  
**Changing the Web UI port at the CLI**  
**Web and CLI Backups**
